

# YOUR VOICE MATTERS!

Prairie View A& M University's Smart and Connected Community Research Team and the City of Prairie View have partnered in seeking a "Smart City Grant" to improve the lives of Prairie View City residents.

We need participants for the Community Meeting group discussion.

Our conversations will allow us to gather invaluable feedback on new technologies that we want to bring to the citizens of PVC. We also want to know how we can work together to improve PVC.

Your comments/concerns will help us get needed information on how technology can help with medical, safety and other concerns.

## GENERAL INFORMATION
